

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

The University of Chicago Press
Chicago, Illinois, U. S. A.

TABLE OF CONTENTS

	PAGE
Variation of fungi due to environment (with thirty-seven figures) - - - - - <i>F. L. Stevens and J. C. Hall</i>	I
The development of the gametophytes and fertilization in <i>Juniperus communis</i> and <i>Juniperus virginiana</i> (with plates I-IV) - - - - - <i>Alice M. Otteley</i>	31
The structure of the wood in the Pineae (with plate V) <i>Irving W. Bailey</i>	47
Evolutionary tendencies among gymnosperms. Contributions from the Hull Botanical Laboratory 127 - - - - - <i>John M. Coulter</i>	81
On similarity in the behavior of sodium and potassium (with four figures) - - - - - <i>W. J. V. Osterhout</i>	98
Toxic and antagonistic effects of salts as related to ammonification by <i>Bacillus subtilis</i> (with five figures) - - - - - <i>Chas. B. Lipman</i>	105
The gametophytes of Calopogon (with plates VII-IX) <i>Lula Pace</i>	126
On mesarch structure in Lycopodium (with plate X) <i>Edmund W. Sinnott</i>	138
Preliminary account of the ovule, gametophytes, and embryo of <i>Widdringtonia cupressoides</i> (with plate XI and three figures) - - - - - <i>W. T. Saxton</i>	161
The behavior of chromosomes in <i>Oenothera lata</i> × <i>O. gigas</i> . Contributions from the Hull Botanical Laboratory 128 (with plates XII-XIV) - <i>Reginald Ruggles Gates</i>	179
The development of the embryo sac of <i>Smilacina stellata</i> (with plate XV) - - - - - <i>F. McAllister</i>	200
A study of piñon pine - - - - - <i>F. J. Phillips</i>	216
The embryo sac of Habenaria (with twelve figures) - <i>William H. Brown</i>	241
The influence of traction on the formation of mechanical tissue in stems - - - - - <i>John S. Bordner</i>	251
The modifiability of transpiration in young seedlings (with five figures) - - - - - <i>Joseph Y. Bergen</i>	275
A remarkable Amanita (with eight figures) - - <i>George F. Atkinson</i>	283
Undescribed plants from Guatemala and other Central American republics. XXXII - - - <i>John Donnell Smith</i>	294
Some fungus parasites of algae (with seven figures) - <i>George F. Atkinson</i>	321
Mitosis in Synchytrium (with plates XVI-XVIII) - <i>Robert F. Griggs</i>	339
Influence of electricity on microorganisms (with two figures) - - - - - <i>George E. Stone</i>	359
Cytology of Cutleria and Aglaozonia. Contributions from the Hull Botanical Laboratory 129 - - <i>Shigéo Yamanouchi</i>	380

Dioon spinulosum (with seven figures). Contributions from the Hull Botanical Laboratory 131	<i>Charles J. Chamberlain</i>	401
The influence of gravity on the direction of growth of <i>Amanita</i> (with thirteen figures) - - -	<i>Stella G. Streeter</i>	414
The <i>Williamsonias</i> of the Mixteca alta (with ten figures) - - - - -	<i>G. R. Wieland</i>	427
Sap pressure in the birch stem (with five figures). Part I - - - - -	<i>H. E. Merwin and Howard Lyon</i>	442
Part II - - - - -	<i>H. E. Merwin</i>	447

BRIEFER ARTICLES—

Notes on the embryology of the Nymphaeaceae (with plate VI) - - - - -	<i>Mel. T. Cook</i>	56
Some hitherto undescribed plants from Oregon	<i>J. M. Greenman</i>	146
On the demonstration of the formation of starch in leaves - - - - -	<i>Sophia Eckerson</i>	224
The morphology of <i>Ruppia maritima</i> —a criticism	<i>Raymond H. Pond</i>	228
New normal appliances for use in plant physiology (with two figures) - - - - -	<i>W. F. Ganong</i>	301
Oxygen pressure and the germination of <i>Xanthium</i> seeds. Contributions from the Hull Botanical Laboratory 130 - - - - -	<i>Chas. A. Shull</i>	387
Concavity of leaves and illumination (with one figure) - - - - -	<i>Joseph Y. Bergen</i>	459
Roezl and the type of <i>Washingtonia</i> - - -	<i>S. B. Parish</i>	462
Longevity of seeds - - -	<i>Alfred J. Ewart and William Crocker</i>	463

CURRENT LITERATURE— - - - - 61, 149, 230, 306, 391, 465
